2023 AACC* Annual Scientific Meeting + Clinical Lab Expo has been a big success for Prolight Diagnostics

This week Prolight Diagnostics participated in the 2023 AACC* Annual Scientific Meeting + Clinical Lab Expo in Anaheim, US which has been a very successful meeting for the company. Strong positive feedback confirmed that Prolight offers a novel, innovative, unique POC product which is likely to offer great benefits to patients and healthcare in general.

During the congress, Prolight showcased for the first time our novel POC system concept. The company had the opportunity to speak to over one hundred interested visitors to our stand, from countries as diverse as US, Canada, China, India, Japan, South Korea, France, Germany, Italy, United Kingdom and Spain. Many visitors expressed curiosity and interest over Prolight's progress, not least the groundbreaking technology for counting individual molecules on a small portable POC instrument. During the congress Prolight also had the opportunity to have several meetings with large global diagnostic companies.

For Prolight it was inspiring to repeatedly get confirmation on how innovative and unique our digital POC technology is, and how it may become extremely beneficial for healthcare and patients. Furthermore, we have established contact with many potential industrial partners with whom we will have follow-up discussions. The significant interest for Prolight during this congress gives us a lot of inspiration and confirms that the company is on the right track.

* AACC is now becoming the Association for Diagnostic & Laboratory Medicine (ADLM)
